Monochrome style

Decra Fused Tiles bring you their brand new, up-to-the-minute monochrome collection. These hand-made, miniature works of art, fused together at very high temperatures, will complement any stylish home.

The beautiful pieces of glass come in a range of shapes and patterns, from squares and diamonds to trapezoids. A quadrant is also included in the range, which may serve as a corner piece.

The tiles have a wonderful smoothness which not only looks great, but makes bonding them to glass very easy. Decra Fused Tiles can be used (internally or externally) for doors, windows, glass furniture panels, conservatories and even mirrors.
